The plum-coloured lint roller is without doubt the best-known aid for removing fluff from suits, blazers, sports jacket and other clothing. With a mind to sustainability it has been designed for re-use. Therefore the range of care products includes 2 refill rolls, each with 24 sheets of adhesive film, for the lint roller. When a sheet is unable to pick up any more fluff, it is simply removed. Underneath there is the next sheet, ready for use.
