Rundstricknadel Circulars Bamboo Patina

Art.Nr.: fcn_bamboo_cg / Brand: ChiaoGoo

As a natural alternative to the stainless steel needles, the circular knitting needles are available in bamboo or wood versions. Here too, only the best raw materials are used, such as Chinese Moso bamboo and red birch wood. The round knitting needles made of these materials are characterized by their pleasant surface and extreme lightness. All needles have very finely worked tips and transitions, which makes it easier to pick up the yarn and make the pattern more uniform. The needles are perfectly balanced and the pleasant surface provides a warm feel and allows the yarn to slide well.
These needles are available in six different lengths. From a length of 60 cm, all needle sizes over 10.0 mm are made of wood. (The needle size 25 mm is made of white birch wood.) The sizes up to 3.0 mm use the same premium cables as the KNIT RED series, but with transparent sheathing. Larger sizes have fixed junctions and use freely rotating, flexible cables made of transparent nylon, which allow a very comfortable knitting.
The round knitting needles made of Moso bamboo are available only as a patina version.
