Product information

Koshitsu Asymmetric Circular Needles

Art.Nr.: rundstr_seeknit_koshi_asy / Brand: Seeknit

Length:	23 cm
Material:	Koshitsu Bambus

The asymmetric circular needle is a Seeknit original product developed in 2010 to make knitting small diameter tubes such as socks comfortably. One of the needles is just one centimeter shorter than the other and that makes a big difference in smoothness and comfort.

Our exclusive original 23cm Asymmetric Circular Needles were developed for use with sock yarn, and are available in diameters from 2.00mm to 6.00mm. Asymmetric Circular Needles have a short needle and a long needle. Put the stitches on the short needle and work through with the long needle. Since the moving needle is longer it is easier to hold, making these suited for small circular projects such as socks. Our metal parts made of brass is nickel-free.
