Sales unit:	5 St
Material:	Ebenholz

Product information

Like all Lantern Moon knitting needles, the Lantern Moon double point knitting needles are made of ebony, one of the world’s most valuable woods. The liquid silk finish is warm and easy on the hand and ensures a smooth, no-snag stitch glide. The transition from one double point needle to the next is smoothly made thanks to the even surface of the needles and the perfectly shaped tips that work well with every type of yarn.

The Lantern Moon Double Point Needles come in two lengths: 6” and 8”. The 6” double point needles are perfect for producing small circumference projects, as well as socks. The expertly shaped double point tips ensure smooth stitching all the way round and enable easy transition from one needle to the next. The 8” double point needles are the DPN’s of choice for larger knit-in-the-round projects.
