Product information

Double Pointed Needles Takumi®

Art.Nr.: dpn_cl / Brand: Clover

Material: Bambus

- Hi-Tech Processing
- Clover’s high quality processing technology produces Takumi excellence.
- Needle shaft has even thickness
- Complying with our precise standards promises neat stitches and beautiful results.
- Smooth surface
- A smooth surface is the result of being polished several times with a fine abrasive in the direction of the needle shaft.
- This allows the yarn to glide easily along the needles and reduces hard fatigue.
- Pleasantly round needlepoint that never splits yarn
- Clover’s standard of round, even, delicately polished tips leaves no fragments to split yarn.
- Our Takumi line features newly tapered tips.
- We offer a vast range for our Takumi series.
