Art.Nr.: 279695_lk / Brand: Pro Lana

Sales unit:	100 g
Material:	63% Polyacryl/30% Viskose/7% Polyester Elité
Length:	ca. 400 m

Sustainability in the world of sock yarn – the exceptionally soft and elastic nature of our Bamboo Socks Uni can largely be attributed to its high bamboo content. These socks are distinguished not only by their deodorizing and antibacterial properties but also by their exceptional moisture absorption capability. Bamboo, as the foundation of our socks, is a rapidly growing plant that requires only a fraction of the water consumption compared to cotton. Thus, it serves as a prime example of our commitment to environmental friendliness.
