Jeans Repair Kit

Art.Nr.: 136-0929190-000000 / GTIN: 4049909291900 / Brand: Prym

Your favourite jeans have a hole? No problem, the Prym Jeans Repair Kit makes it easy to mend a pair of jeans. The repair kit contains 3 dark blue and 2 light blue patches – 4 coated for ironing on, 1 for sewing on. The set also includes sewing

Product information

thread in blue and ochre as well as useful tools: Pincushion, pins, sewing needles and needle threader. If a sewing machine is available to repair the jeans, zigzag or overlock stitching is the way to go. And you can even repair a torn pair of jeans with an iron. The iron-on patches in the jeans repair kit are ideal for this. All you need is a standard iron and the patches can be ironed onto the jeans – whether they are torn at the knee or thigh. Sewing on increases the secure hold, especially in areas subject to heavy wear. Repairing old jeans is not only a lot of fun and creates new personal favourites, it also helps you live more sustainably. Instead of waste, the jeans repair kit results in a creative project that makes you happy and is great to show off.
