Product information

Freyr mattress topper

Art.Nr.: freyr_lopi / Brand: Lopi

Sales unit: 1 St.

The Freyr Mattress Topper is made with Icelandic wool filling and a cotton cover. The moisture- and temperature regulation properties of the wool make Freyr a naturally breathable mattress topper. Icelandic wool is mildew- and bacteria resistant as well as odour repellent. This high quality mattress topper will improve the quality of your sleep and extend your mattress life expectancy. Freyr is easy to care for and machine washable.

Benefits
Sleeping surrounded by wool will improve your sleep, and there are scientific reasons for that. The wool regulates your body temperature. The wool fibres in our mattress toppers are nonwoven, which means there is volume between the fibres. This allows for air to be trapped between them (air is a great insulator). This structure maximises the efficiency of the wool as thermal insulator.

Product information

What happens if you are too hot? Wool is a great moisture regulator and can absorb up to 30% of its own weight in moisture. Wool fibres absorb moisture and excess heat from your body and release it on the outside. This keeps you comfortably dry and cosy at the right temperature.

Lopidraumur products are eco-friendly, sustainable and animal friendly. Our products are naturally hypoallergenic.

Properties

- Natural
- Breathable
- Sustainable
- Eco friendly
