Product information

Eco Vita 388

Art.Nr.: vita_388_dmc / Brand: DMC

Sales unit:	100 g
Material:	80% recycelter Baumwolle/20% andere Fasern
Length:	ca. 250 m

Eco Vita is an environmentally friendly yarn for knitting and crocheting. The yarn comes from textile scraps that are sorted by color and composition. The fibers are then chopped, shredded, and spun into a new yarn. This technique requires no dyeing process, and the new yarn is not retreated. This tubular yarn is suitable for knitted or crocheted garments. It is light and comfortable to work with and highlights raised decorative stitches. Eco Vita is a 100% recycled yarn made from 80% recycled cotton and 20% other recycled fibers. We recommend using Eco Vita yarn with size 4 or 5 needles for a soft, fresh, and natural feel. The wide range of colors is inspired by nature and allows you to create a sustainable wardrobe for the
