Length:	ca. 112 m

Product information

Naturally light and luxurious, Elements DK is a sophisticated yarn in shades inspired by the joyful hues of summer. This sustainable yarn has been created with the environment in mind and uses a naturally harmonious blend of Falkland Islands wool and TENCELTM Lyocell harvested from sustainably managed wood sources, which are biodegradable and fully compostable. The yarn creates a super-soft breathable fabric with graceful drape and superb sheen, making it a fantastic choice for summer tops, cardigans and sweaters. Elements DK also enhances lace, colourwork and textures beautifully.
