Product information

Practical pattern notcher for sewing and crafting
With the pattern notcher from Prym, markings on paper or cardboard patterns can be punched effortlessly and then traced or notched more easily. Whether you are a professional tailor or an enthusiastic hobbyist – anyone who does a lot of sewing will be delighted with this pattern tool. The notcher is not only a valuable tool for sewing, but is also ideal for punching semi-circular notches into tickets, photo paper or business cards.

Pattern notcher in an ergonomic shape
The pattern notcher impresses with its design and function: the ergonomically shaped curved handle sits comfortably in the hand, while the integrated spring reduces the amount of effort required. Both features mean the notcher is easy on the hands – for a more enjoyable experience, even when working on complex sewing projects and using the tool for prolonged periods.
High-quality notcher made from durable steel
Made from high-quality steel, the pattern notcher is also characterised by its exceptional durability. Semi-circular notches measuring 6.6 mm long and 1.5 mm wide can be punched into paper and cardboard time and time again – ideal for making precise markings on patterns. The pattern notcher from Prym is a quality product that will last a long time.
